## Activity Sheet Answers: Simple Machines

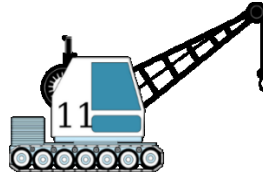

The types of simple machines are ramps, screws, levers, pulleys, wheels and axles, wedges, and gears. Label each object below with a simple machine it uses.

screw

ramp, wheel + axle

wheel + axle, pulley

lever, wedge

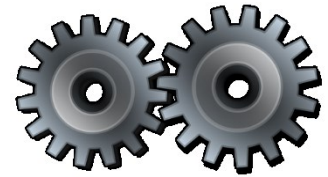

lever, wedge

Lever, wheel + axle

wheel + axle

gears

Write the names of the seven types of simple machines under the name of the family they belong to. Ex. levers are part of the lever family.

Inclined Planes	Levers
<ul style="list-style-type: none"> <li>• Ramps</li> <li>• Screws</li> <li>• Wedges</li> </ul>	<ul style="list-style-type: none"> <li>• Levers</li> <li>• Wheels and axles</li> <li>• Pulleys</li> <li>• Gears</li> </ul>
