WORKING WITH THE DIGITAL INNOVATION LAB

Working with the lab offers a unique opportunity to connect, collaborate, and create in an innovative hub that improves access to digital experiences. We provide customary services to help design, enhance, test and deploy your digital product against the highest standards in digital accessibility.

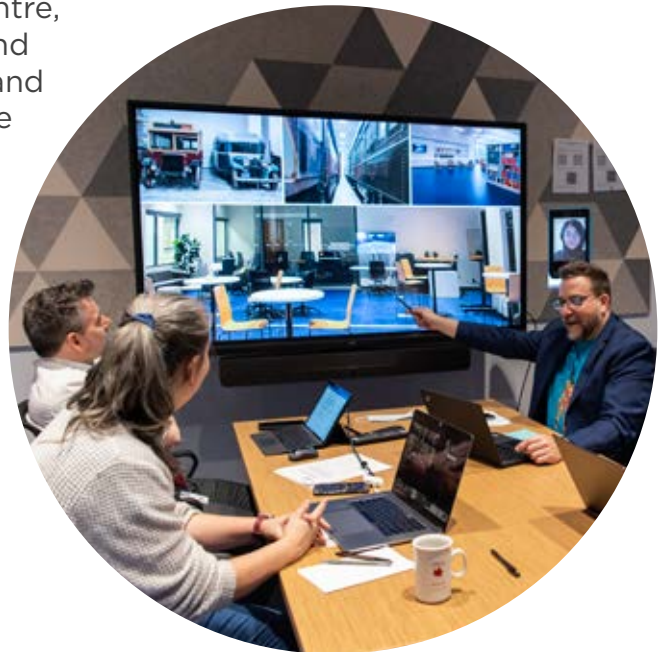

THE DIGITAL INNOVATION LAB: RENTALS AND EVENTS

The Digital Innovation Lab boasts a distinctly unique, modern, and versatile floorplan. With accessibility at the forefront, the open-concept space provides modular furniture for a variety of set-ups, whiteboard tables to foster collaboration, and access to digital AV technology.

Located in the state-of-the-art Ingenium Centre, the Lab is positioned to provide one-of-a-kind access to the national collection of science and innovation. Rentals can be tailored to include behind-the-scenes tours of the collection rooms, which house artifacts of national significance in areas of science, medicine, communications technologies, industrial technologies, land and rail transportation, agriculture, and more.

The Lab is ideal for panel presentations, lectures, meetings, product launches, and collaborative events such as webinars and hands-on workshops.

DIGITAL INNOVATION LAB

LAB FEATURES AND ADD-ONS

- Sennheiser MobileConnect can be accessed via smartphone, allowing users access to live presentation audio via bluetooth-enabled hearing aids
- Tabletop, handheld, and wireless over-the-ear microphones synced to the audio system to allow for easy presenting
- Height-adjustable 75 inch touchscreen for workshops and presentations
- Moveable furniture with adjustable heights to accommodate different projects and set-ups
- A large rolling door, allows big objects to be brought into the Lab, as well as creates an open-concept flow to the outside space
- 4K projector and retractable screen for podium presentations
- Free wi-fi access

Additional technical add-ons can be discussed on a case-by-case basis.

Rental offerings can include:

- On-site event coordinator to assist with logistics, equipment, and technology leading up to the event
- On-site event staff to set up, tear down and remain present throughout your event
- On-site security presence
- Provision and set-up of chairs and/or tables
- Presentation set-up, including screen, projector, microphone and podium
- Behind-the-scenes access to the Ingenium collection, via guided tours
- Access to breakout rooms, seating up to 10 people each

Capacity:

Theatre: 100

Banquet: 80

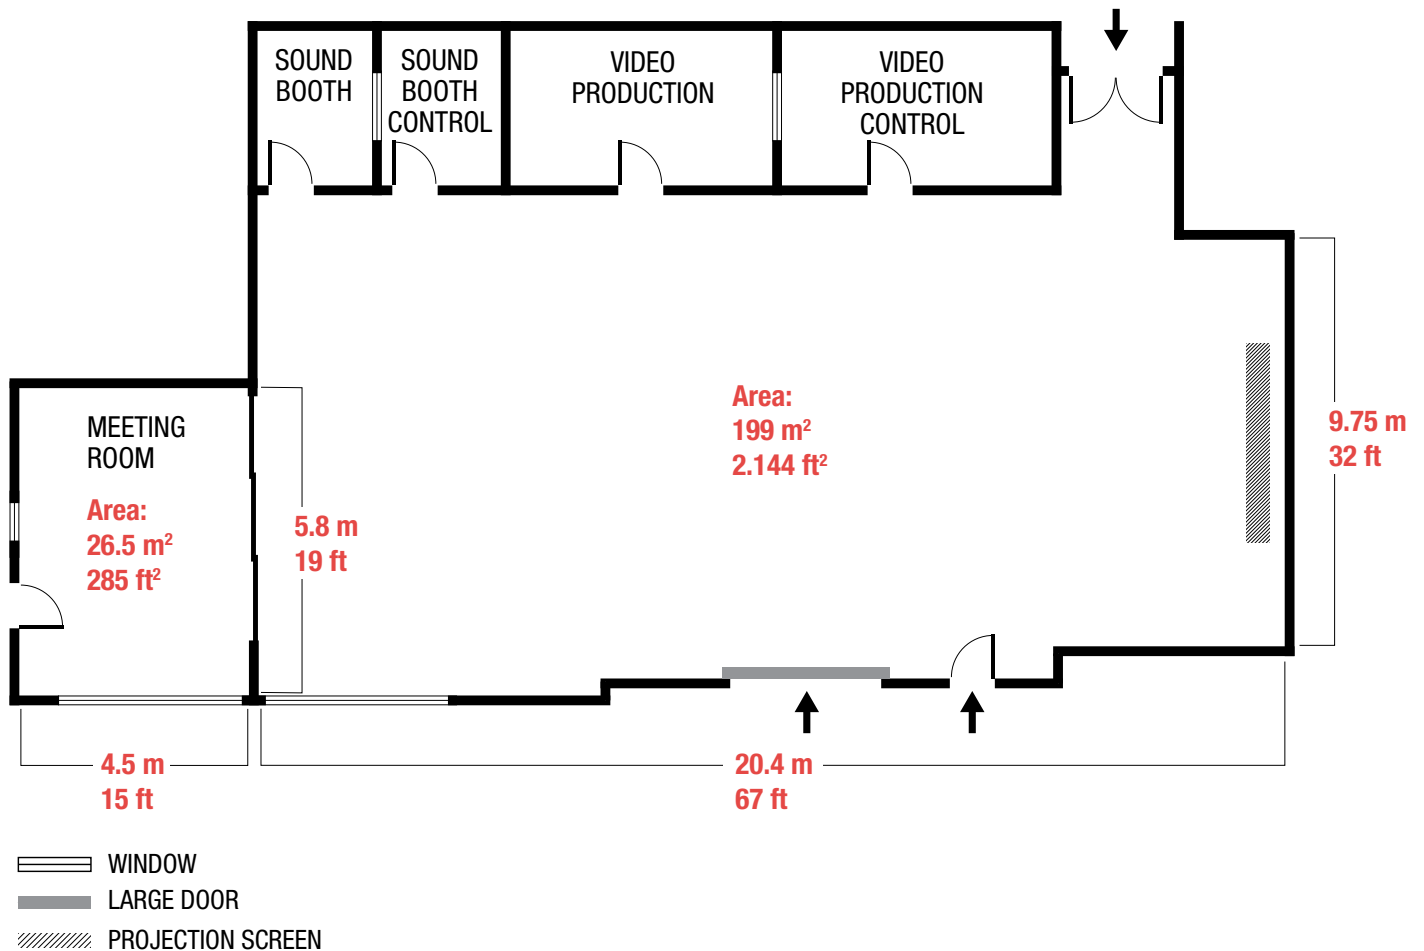

Rental Fees:

\$2000+

Fees can be discussed based on your event space and technical requirements.

Vendors:

We have a list of preferred vendors for catering, décor, photography, audiovisual support and entertainment services to assist with any additional needs. We do not permit self-catered events.

DIGITAL INNOVATION LAB

ABOUT THE DIGITAL INNOVATION LAB

Unique in Canada, the Digital Innovation Lab connects national and international collaborators with Ingenium's user experience, interpretive, and digital experts to develop digital accessibility solutions, methods and products to help improve access to museums spaces, collections, and experiences for all Canadians.
